

Client requested Freyssinet to realize Repair works to all PT slabs effected by fire through Dry Shotcrete Technique.

Freyssinet scope was to design the repair solution in accordance to the diagnosis and assessment recommendation report.

As the in situ concrete is of high strength, Freyssinet qualified the use of its own material, (FOREVACRETE 60.8) which was the only available product the could meet the required strength capacity

Freyssinet Gulf LLC, PO Box 36211, Dubai, UAE
